by widinnovations

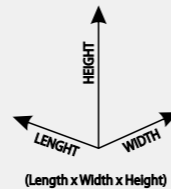

L300

Laminator

The WidLaminator equipment line was developed to provide a quick & affordable answer to market needs. We develop a robust, reliable and technologically advanced lineup of user friendly easy to use equipment.

Dimensions (L x W x H): 2010 x 650 x 1350 mm
Weight: 210 kg
Energy: 220v 16A
Maximun Material Width: 1620 mm

Best Laminators in the market
We have a complete line of equipment able to rival the best equipment on the market.

First Grade Materials
Thanks to the intelligent and robust design of the widlaminator equipments and its quality materials, we guarantee reliability, precision and robustness.

Main Specifications

- Maximun material lenght of 1620mm
- 130mm diameter silicon rolls
- 35mm material thickness
- Speed up to 7m/minute
- Manual and automatic mode
- Silent compressor included
- Security sensor
- Longitudinal cutting blades

Heating

- Superior roll with heating up to 60° C
- Precise temperature control
- Infrared heating

Work Method

- Independent roll tension control
- Pneumatic upper roll control
- Individual tension control
- Laminated support fixing system
- Material take up roll for laminated materials
