BACK FENCE

Our NEW **ATLAS - Back Fence** is an exciting, low-cost addition to the Trimalco range. Manufactured in the UK, the **Back Fence** connects the material guides, one on the left and one on the right and runs parallel to your cutter. Each material guide is 98cm (38½") long and fitted with a full length metric/imperial scale simplifying the repeatability of parallel cuts.

The **ATLAS - Back Fence** is designed to fit tabletops 19mm (3/4") thick but can be easily adapted to fit any thickness. The high-profile leading edge on the guide will provide the perfect block for even the toughest of materials, preventing any movement during the cutting process. Fitting and calibrating is a simple process, full instructions are provided. The photograph opposite shows a "Back Fence 160" fitted to an "ATLAS for Helios 160" table with a "HELIOS 160" cutter fitted.

AVAILABLE IN 5 SIZES

4822	ATLAS back fence 160
