MATERIAL GUIDE AND STOP

Our NEW **ATLAS - Material Guide and Stop** is an exciting, low-cost addition to the Trimalco range. Manufactured in the UK from anodised aluminium, it is designed to sit at 90 degrees to your cutter and to assist in providing a square cut every time.

A production stop and a full-length metric/imperial scale simplifies the cutting of predefined and/or repeat sizes .

The **ATLAS - Material Guide & Stop** is designed to fit tabletops 19mm (3/4") thick but can be easily adapted to fit any thickness. The 98cm (38½") long high-profile leading edge will provide the perfect block for even the toughest of materials, preventing any movement during the cutting process. Fitting and calibrating is a simple process, full instructions are provided.

Although the **ATLAS - Material Guide & Stop** was designed to complement our range of cutters and worktables, it will work equally as well on most tables and with most cutters.

- Improves your cutting capability
- Guarantees a square cut every time
- Speeds up alignment and repeatability
- Easy to read Metric/Imperial scale
- Simple to fit and calibrate
- Works equally as well on most tables and with most cutters
